

# SME ALCOHOL

SME provides alcohol of the highest quality, delivered on time, and supported by an experienced team that responds quickly to customer needs. SME is kosher-certified operating under an ISO 9001:2015 certified quality management system.

## What Makes SME Different

### QUALITY

We have a commitment to make sure our products meet the highest quality standards.

### CLEANLINESS

Because we closely follow GMP standards, our facility is always above board and tour-ready.

### CUSTOMIZATION

With custom SDA blend capabilities, we can create and register any approved formula.

### PARTNERSHIP

We work closely with our customers to provide ongoing collaboration and support.

**70+ million bushels** of locally sourced grain is used to create our renewable products.

Our state-of-the-art system can produce over **20 million gallons** of grain neutral spirits.

The conversion of grain to alcohol results in **160,000 tons** of animal feed annually.

## Distilled Products

Our alcohol is distilled through a state-of-the-art system that combines new equipment with advanced technology.

## Grain Neutral Spirits

While our grain neutral spirits can be produced to any proof, all are tested with top-of-the-line equipment and certified to meet the highest quality standards.

### 200 PROOF GNS

Our 200 proof grain neutral spirits are 100% pure alcohol.

### 190 PROOF GNS

Our 190 proof grain neutral spirits are 95% pure alcohol and 5% water.

## Denatured Products

Our denatured product varieties include completely denatured alcohol, specially denatured alcohol, and industrial solvents.

### SDA

Our Specially Denatured Alcohol (SDA) is most commonly used in cosmetic products, chemical manufacturing, pharmaceuticals, and solvents.

**2B 3A 3C 23A**  
**29 30 35A 38B**  
**38F 39C 40B**

### CDA

Completely Denatured Alcohol (CDA) is often used for industrial purposes, biofuels, paints, antifreeze, and cleaning products.

**12-A 18 19**  
**20 35**

### INDUSTRIAL SOLVENTS

Industrial solvent is denatured alcohol designed for use in inks, detergents, coatings, resins, and dyes.
